

# Bio – Made in Kymenlaakso, Finland

## Webinar for boosting regional bio and circular economy

Thursday, 30.9.2021 at 13 EEST (10 am UTC time)

### What is this webinar for?

The webinar raises the current bio and circular economy activities mostly in Kymenlaakso region, but also elsewhere in Europe.

In addition, the webinar promotes bio and circular economy, connects potential new partners and strengthens existing partnerships.

Through new project ideas emerged from the webinar theme and discussions, the webinar seeks new openings and opportunities for collaboration.

Presenters of this four-hour are mostly from forest industry, enterprisers, universities and regional companies. The target audience is people working within bio and circular economy themes around Europe.

The webinar will create good basis for meetings after COVID19.

### Come and join our webinar in September!

We will hear

- How forest industries in Kymenlaakso region act to accelerate sustainable living and to create future beyond fossils? (Kotkamills, Stora Enso, UPM)
- What are sustainable solutions for bio and circular economy and the role of rural areas? (LUT, HU)
- What kind of bio and circular projects are going on abroad? (SEI Tallinn, The CoE BbE)
- How can SME-industries act for the environment?
- What are the roles of regional developers supporting companies in their RDI development work?

### More information

The event is free of charge. Please follow our website, where we will update the program of the webinar as well as the registration form:

[www.xamk.fi/en/research-and-development/new-openings-in-the-bioeconomy-but/](https://www.xamk.fi/en/research-and-development/new-openings-in-the-bioeconomy-but/)

**New openings in the Bioeconomy (BUT)** is a project managed and implemented by South-Eastern Finland University of Applied Sciences (Xamk). The webinar is organized as a part of the project together with the project partner Kouvola Innovation.
